Subject index

Adsorption isotherms

Gas-adsorption study of the surface dehydroxylation and rehydroxylation of controlled porosity glasses, B. Biliński, W. Wójcik and A.L. Dawidowicz 52 (1991) 125

Alkali metals

On the work function changes produced by the coadsorption of alkali metals and hydrogen, G.E. Rhead 52 (1991) 19

Alloys

Composition and growth mechanisms of alumina scales on FeCrAl-based alloys determined by SNMS, W.J. Quadakkers, A. Elschner, W. Speier and H. Nickel 52 (1991) 271

Improved resolution SIMS analysis of annealed Pt/Zn/Pt/ZrB_2/Au ohmic contacts to p-InGaAs on InP substrates using back-surface profiling, J. Herniman, J.S. Yu and A.E. Staton-Bevan 52 (1991) 289

Aluminium

The reactions of oxidised aluminium surfaces with lubricant additives and related compounds, J.A. Treverton, J. Ball and M. Fairlie 52 (1991) 107

Laser-induced forward transfer of aluminium, V. Schultze and M. Wagner 52 (1991) 303

Aluminium oxide

Correlation of surface composition and thiophene HDS activity of moderately sulfided CoMo/Al_2O_3 catalysts, T.I. Korányi and Z. Paál 52 (1991) 141

Acid–base behavior of aluminum and silicon oxides – a combination of two approaches: XPS and Lewis acido-basicity; rest potential and Brönsted acido-basicity, M. Casamassima, E. Darque-Ceretti, A. Etcheberry and M. Aucouturier 52 (1991) 205

Ammonia

Evidence for the role of surface transients and precursor states in determining molecular pathways in surface reactions, M.W. Roberts 52 (1991) 133

Auger electron spectroscopy

Electrical characteristics of silicon nitride on silicon and InGaAs as a function of the insulator stoichiometry, P.E. Bagnoli, A. Piccirillo, A.L. Gobbi and R. Giannetti 52 (1991) 45

Structural integrity and thermal stability of TiN/$CoSi_2$ used as local interconnect in a self-aligned $CoSi_2$ process, R.I. Hegde, R.E. Jones, Jr., V.S. Kaushik and P.J. Tobin 52 (1991) 59

TPD studies of vanadium oxide films deposited on gold, K.B. Lewis, S.T. Oyama and G.A. Somorjai 52 (1991) 241

A thin SiO layer as a remedy for the indium reduction at the $In_2O_3/\mu c$-Si:C:H interface, J.M.M. de Nijs, C. Carvalho, M. Santos and R. Martins 52 (1991) 339

The diffusion behaviour of Pb in yttrium iron garnet films, G.N. van Wyk, S. Priggemeyer, W.D. Roos and W. Heiland 52 (1991) 351

Band structure

Chemical shifts of the O 1s core levels for oxygen dimers in $YBa_2Cu_3O_{7-\delta}$: cluster DVM-Xα calculations, G.L. Gutsev, Yu.M. Shul'ga and V.I. Rubtsov 52 (1991) 329

Carbon

Silicon–carbon reaction provoked by the sputter cleaning of lightly contaminated crystalline silicon, B. Lamontagne, E. Sacher and M.R. Wertheimer 52 (1991) 71

Oxidation state of lead promotor on a palladium/carbon catalyst before and during the oxidation of alcohols, T. Mallat, T. Allmendinger and A. Baiker 52 (1991) 189

Carboxylic acid

The reactions of oxidised aluminium surfaces with lubricant additives and related compounds, J.A. Treverton, J. Ball and M. Fairlie 52 (1991) 107

Catalysis

Correlatior of surface composition and thiophene HDS activity of moderately sulfided $CoMo/Al_2O_3$ catalysts, T.I. Korányi and Z. Paál 52 (1991) 141

Oxidation state of lead promotor on a palladium/carbon catalyst before and during the oxidation of alcohols, T. Mallat, T. Allmendinger and A. Baiker 52 (1991) 189

XPS and XRD studies of supported Pd–Cu bimetallics, B.L. Gustafson and P.S. Wehner 52 (1991) 261

Cathodes

Imperfect boundaries: thermal response of the cathode surface of a potted heater–cathode assembly, D.S. Venkateswarlu and A. Sil 52 (1991) 7

Chemical vapour deposition

Evidence for the existence of an interface transition layer for plasma CVD grown SnO_2/Fe_2O_3 multi-layer films, Yan Dawei and Ma Xiaocui 52 (1991) 53

Numerical analysis of fluid flow and nonuniformities in a polysilicon LPCVD batch reactor, Ch. Hopfmann, Ch. Werner and J.I. Ulacia F. 52 (1991) 169

Photoluminescence investigation of III–V semiconductor surface damage induced by PECVD silicon nitride films, A. Piccirillo, R. Marzano, A.L. Gobbi and P.E. Bagnoli 52 (1991) 295

A thin SiO layer as a remedy for the indium reduction at the $In_2O_3/\mu c$-Si:C:H interface, J.M.M. de Nijs, C. Carvalho, M. Santos and R. Martins 52 (1991) 339

Chemisorption theory

Evidence for the role of surface transients and precursor states in determining molecular pathways in surface reactions, M.W. Roberts 52 (1991) 133

Cobalt

Hydrogen adsorption on cobalt/Pt(110)(1 × 2) surfaces, M. Alnot and J. Fusy 52 (1991) 77

Correlation of surface composition and thiophene HDS activity of moderately sulfided $CoMo/Al_2O_3$ catalysts, T.I. Korányi and Z. Paál 52 (1991) 141

Compound formation

Silicon–carbon reaction provoked by the sputter cleaning of lightly contaminated crystalline silicon, B. Lamontagne, E. Sacher and M.R. Wertheimer 52 (1991) 71

XPS and XRD studies of supported Pd–Cu bimetallics, B.L. Gustafson and P.S. Wehner 52 (1991) 261

Copper

A comparative study of the inhibition effects of benzotriazole and 6-aniline-1,3,5-triazine-2,4-dithiol monosodium salt on the corrosion of copper by potentiodynamic polarization, AC impedance and surface-enhanced Raman spectroscopic techniques, G. Zhou, S. Cai, L. Song, H. Yang, A. Fujishima, A. Ibrahim, Y.G. Lee and B.H. Loo 52 (1991) 227

XPS and XRD studies of supported Pd–Cu bimetallics, B.L. Gustafson and P.S. Wehner 52 (1991) 261

Corrosion

A new electrochemical method for the determination of the free surface of phosphate layers, A. Losch, J.W. Schultze and H.-D. Speckmann 52 (1991) 29

A comparative study of the inhibition effects of benzotriazole and 6-aniline-1,3,5-triazine-2,4-dithiol monosodium salt on the corrosion of copper by potentiodynamic polarization, AC impedance and surface-enhanced Raman spectroscopic techniques, G. Zhou, S. Cai, L. Song, H. Yang, A. Fujishima, A. Ibrahim, Y.G. Lee and B.H. Loo 52 (1991) 227

Cuprous oxide

Chemical shifts of the O 1s core levels for oxygen dimers in $YBa_2Cu_3O_{7-\delta}$: cluster DVM-Xα calculations, G.L. Gutsev, Yu.M. Shul'ga and V.I. Rubtsov 52 (1991) 329

Diffusion

A thin SiO layer as a remedy for the indium reduction at the $In_2O_3/\mu c$-Si:C:H interface, J.M.M. de Nijs, C. Carvalho, M. Santos and R. Martins 52 (1991) 339

The diffusion behaviour of Pb in yttrium iron garnet films, G.N. van Wyk, S. Priggemeyer, W.D. Roos and W. Heiland 52 (1991) 351

Electrical properties

Electrical characteristics of silicon nitride on silicon and InGaAs as a function of the insulator stoichiometry, P.E. Bagnoli, A. Piccirillo, A.L. Gobbi and R. Giannetti 52 (1991) 45

Evidence for the existence of an interface transition layer for plasma CVD grown SnO_2/Fe_2O_3 multi-layer films, Yan Dawei and Ma Xiaocui 52 (1991) 53

A comparative study of the inhibition effects of benzotriazole and 6-aniline-1,3,5-triazine-2,4-dithiol monosodium salt on the corrosion of copper by potentiodynamic polarization, AC impedance and surface-enhanced Raman spectroscopic techniques, G. Zhou, S. Cai, L. Song, H. Yang, A. Fujishima, A. Ibrahim, Y.G. Lee and B.H. Loo 52 (1991) 227

Passivation of shallow donors in GaAs by oxygen plasma exposure, I. Thurzo, E. Pinčík, L. Harmatha, V. Nágl and M. Gaži 52 (1991) 311

A thin SiO layer as a remedy for the indium reduction at the $In_2O_3/\mu c$-Si:C:H interface, J.M.M. de Nijs, C. Carvalho, M. Santos and R. Martins 52 (1991) 339

Electron energy loss spectroscopy

Evidence for the role of surface transients and precursor states in determining molecular pathways in surface reactions, M.W. Roberts 52 (1991) 133

HREELS, XPS and in-situ friction studies of thin polyphenyl ether films on steel surfaces, B.M. DeKoven and G.E. Mitchell 52 (1991) 215

Adsorption and decomposition of trimethylgallium on Pt(111), Z.-M. Liu, X.-L. Zhou and J.M. White 52 (1991) 249

Temperature dependence of Ni^{3+} quantity in the surface layer of NiO, G. Tyuliev and M. Sokolova 52 (1991) 343

Electron microscopy

A new electrochemical method for the determination of the free surface of phosphate layers, A. Losch, J.W. Schultze and H.-D. Speckmann 52 (1991) 29

Structural integrity and thermal stability of $TiN/CoSi_2$ used as local interconnect in a self-aligned $CoSi_2$ process, R.I. Hegde, R.E. Jones, Jr., V.S. Kaushik and P.J. Tobin 52 (1991) 59

Oxidation state of lead promotor on a palladium/carbon catalyst before and during the oxidation of alcohols, T. Mallat, T. Allmendinger and A. Baiker 52 (1991) 189

TPD studies of vanadium oxide films deposited on gold, K.B. Lewis, S.T. Oyama and G.A. Somorjai 52 (1991) 241

Composition and growth mechanisms of alumina scales on FeCrAl-based alloys determined by SNMS, W.J. Quadakkers, A. Elschner, W. Speier and H. Nickel 52 (1991) 271

Laser-induced forward transfer of aluminium, V. Schultze and M. Wagner 52 (1991) 303

Electron spin resonance

Electrical characteristics of silicon nitride on silicon and InGaAs as a function of the insulator stoichiometry, P.E. Bagnoli, A. Piccirillo, A.L. Gobbi and R. Giannetti 52 (1991) 45

Epitaxy

Angle-resolved photoemission studies of epitaxially grown CuBr films of different thicknesses on Ag(100), H. Engelhard, A. Goldmann, R. Matzdorf and J. Skonieczny 52 (1991) 235

Gallium

Adsorption and decomposition of trimethylgallium on Pt(111), Z.-M. Liu, X.-L. Zhou and J.M. White 52 (1991) 249

Gallium arsenide

Passivation of shallow donors in GaAs by oxygen plasma exposure, I. Thurzo, E. Pinčík, L. Harmatha, V. Nágl and M. Gaži 52 (1991) 311

Glass

Gas-adsorption study of the surface dehydroxylation and rehydroxylation of controlled porosity glasses, B. Biliński, W. Wójcik and A.L. Dawidowicz 52 (1991) 125

Gold

TPD studies of vanadium oxide films deposited on gold, K.B. Lewis, S.T. Oyama and G.A. Somorjai 52 (1991) 241

Halides

Degradation of perfluoropolyethers catalyzed by aluminum chloride, P.H. Kasai and P. Wheeler 52 (1991) 91

Angle-resolved photoemission studies of epitaxially grown CuBr films of different thicknesses on Ag(100), H. Engelhard, A. Goldmann, R. Matzdorf and J. Skonieczny 52 (1991) 235

Heterostructures

Evidence for the existence of an interface transition layer for plasma CVD grown SnO_2/Fe_2O_3 multi-layer films, Yan Dawei and Ma Xiaocui 52 (1991) 53

Structural integrity and thermal stability of $TiN/CoSi_2$ used as local interconnect in a self-aligned $CoSi_2$ process, R.I. Hegde, R.E. Jones, Jr., V.S. Kaushik and P.J. Tobin 52 (1991) 59

Hydrides

On the work function changes produced by the coadsorption of alkali metals and hydrogen, G.E. Rhead 52 (1991) 19

Hydrogen

On the work function changes produced by the coadsorption of alkali metals and hydrogen, G.E. Rhead 52 (1991) 19

Hydrogen adsorption on cobalt/Pt(110)(1 × 2) surfaces, M. Alnot and J. Fusy 52 (1991) 77

Indium oxide

A thin SiO layer as a remedy for the indium reduction at the $In_2O_3/\mu c$-Si:C:H interface, J.M.M. de Nijs, C. Carvalho, M. Santos and R. Martins 52 (1991) 339

Infrared spectroscopy

Electrical characteristics of silicon nitride on silicon and InGaAs as a function of the insulator stoichiometry, P.E. Bagnoli, A. Piccirillo, A.L. Gobbi and R. Giannetti 52 (1991) 45

The reactions of oxidised aluminium surfaces with lubricant additives and related compounds, J.A. Treverton, J. Ball and M. Fairlie 52 (1991) 107

Inorganic compounds

The diffusion behaviour of Pb in yttrium iron garnet films, G.N. van Wyk, S. Priggemeyer, W.D. Roos and W. Heiland 52 (1991) 351

Insulator – semiconductor interfaces

Electrical characteristics of silicon nitride on silicon and InGaAs as a function of the insulator stoichiometry, P.E. Bagnoli, A. Piccirillo, A.L. Gobbi and R. Giannetti 52 (1991) 45

Photoluminescence investigation of III–V semiconductor surface damage induced by PECVD silicon nitride films, A. Piccirillo, R. Marzano, A.L. Gobbi and P.E. Bagnoli 52 (1991) 295

Interfaces

Improved resolution SIMS analysis of annealed $Pt/Zn/Pt/ZrB_2/Au$ ohmic contacts to p-InGaAs on InP substrates using back-surface profiling, J. Herniman, J.S. Yu and A.E. Staton-Bevan 52 (1991) 289

Ion bombardment

Improved resolution SIMS analysis of annealed $Pt/Zn/Pt/ZrB_2/Au$ ohmic contacts to p-InGaAs on InP substrates using back-surface profiling, J. Herniman, J.S. Yu and A.E. Staton-Bevan 52 (1991) 289

Ion scattering

Scaling and self-similarity in growth of clusters on surfaces, M. Zinke-Allmang and L.C. Feldman 52 (1991) 357

Iron

The characterization of the oxidation of Fe by variable exit angle ultrasoft X-ray fluorescence spectroscopy, T. Scimeca and G. Andermann 52 (1991) 199

Iron oxide

Evidence for the existence of an interface transition layer for plasma CVD grown SnO_2/Fe_2O_3 multi-layer films, Yan Dawei and Ma Xiaocui 52 (1991) 53

The characterization of the oxidation of Fe by variable exit angle ultrasoft X-ray fluorescence spectroscopy, T. Scimeca and G. Andermann 52 (1991) 199

Laser processing

High spatial resolution chemical imaging of surfaces by combination of a field-emission ion gun and intense laser radiation, S.P. Mouncey, L. Moro and C.H. Becker 52 (1991) 39

Laser-induced forward transfer of aluminium, V. Schultze and M. Wagner 52 (1991) 303

Surface analysis by photoionization of sputtered species with intense picosecond laser radiation, M.J. Dyer, L.E. Jusinski, H. Helm and C.H. Becker 52 (1991) 151

Lead

Oxidation state of lead promotor on a palladium/carbon catalyst before and during the oxidation of alcohols, T. Mallat, T. Allmendinger and A. Baiker 52 (1991) 189

The diffusion behaviour of Pb in yttrium iron garnet films, G.N. van Wyk, S. Priggemeyer, W.D. Roos and W. Heiland 52 (1991) 351

Luminescence

Photoluminescence investigation of III–V semiconductor surface damage induced by PECVD silicon nitride films, A. Piccirillo, R. Marzano, A.L. Gobbi and P.E. Bagnoli 52 (1991) 295

Magnesium

Evidence for the role of surface transients and precursor states in determining molecular pathways in surface reactions, M.W. Roberts 52 (1991) 133

Mass spectroscopy

High spatial resolution chemical imaging of surfaces by combination of a field-emission ion gun and intense laser radiation, S.P. Mouncey, L. Moro and C.H. Becker 52 (1991) 39

Surface analysis by photoionization of sputtered species with intense picosecond laser radiation, M.J. Dyer, L.E. Jusinski, H. Helm and C.H. Becker 52 (1991) 151

Composition and growth mechanisms of alumina scales on FeCrAl-based alloys determined by SNMS, W.J. Quadakkers, A. Elschner, W. Speier and H. Nickel 52 (1991) 271

Molybdenum

Correlation of surface composition and thiophene HDS activity of moderately sulfided $CoMo/Al_2O_3$ catalysts, T.I. Korányi and Z. Paál 52 (1991) 141

Nickel oxide

Temperature dependence of Ni^{3+} quantity in the surface layer of NiO, G. Tyuliev and M. Sokolova 52 (1991) 343

Nitric oxide

Evidence for the role of surface transients and precursor states in determining molecular pathways in surface reactions, M.W. Roberts 52 (1991) 133

Nitrides

Structural integrity and thermal stability of $TiN/CoSi_2$ used as local interconnect in a self-aligned $CoSi_2$ process, R.I. Hegde, R.E. Jones, Jr., V.S. Kaushik and P.J. Tobin 52 (1991) 59

Nuclear magnetic resonance

Degradation of perfluoropolyethers catalyzed by aluminum chloride, P.H. Kasai and P. Wheeler 52 (1991) 91

Organic substances

HREELS, XPS and in-situ friction studies of thin polyphenyl ether films on steel surfaces, B.M. DeKoven and G.E. Mitchell 52 (1991) 215

A comparative study of the inhibition effects of benzotriazole and 6-aniline-1,3,5-triazine-2,4-dithiol monosodium salt on the corrosion of copper by potentiodynamic polarization, AC impedance and surface-enhanced Raman spectroscopic techniques, G. Zhou, S. Cai, L. Song, H. Yang, A. Fujishima, A. Ibrahim, Y.G. Lee and B.H. Loo 52 (1991) 227

XPS characterization of inserted mercury sulfide single layers in a Langmuir–Blodgett matrix, C. Zylberajch-Antoine, A. Barraud, H. Roulet and G. Dufour 52 (1991) 323

Organometallic vapour deposition

Adsorption and decomposition of trimethylgallium on Pt(111), Z.-M. Liu, X.-L. Zhou and J.M. White 52 (1991) 249

Oxidation

A new electrochemical method for the determination of the free surface of phosphate layers, A. Losch, J.W. Schultze and H.-D. Speckmann 52 (1991) 29

XPS study of thallium oxidation states in precursor TlBaCaCuO HTSC thin films, K.H. Young, E.J. Smith, M.M. Eddy and T.W. James 52 (1991) 85

Oxidation state of lead promotor on a palladium/carbon catalyst before and during the oxidation of alcohols, T. Mallat, T. Allmendinger and A. Baiker 52 (1991) 189

Composition and growth mechanisms of alumina scales on FeCrAl-based alloys determined by SNMS, W.J. Quadakkers, A. Elschner, W. Speier and H. Nickel 52 (1991) 271

Passivation of shallow donors in GaAs by oxygen plasma exposure, I. Thurzo, E. Pinčík, L. Harmatha, V. Nágl and M. Gaži 52 (1991) 311

Oxides

Acid–base behavior of aluminum and silicon oxides – a combination of two approaches: XPS and Lewis acido-basicity; rest potential and Brönsted acido-basicity, M. Casamassima, E. Darque-Ceretti, A. Etcheberry and M. Aucouturier 52 (1991) 205

Oxygen

Evidence for the role of surface transients and precursor states in determining molecular pathways in surface reactions, M.W. Roberts 52 (1991) 133

Palladium

Oxidation state of lead promotor on a palladium/carbon catalyst before and during the oxidation of alcohols, T. Mallat, T. Allmendinger and A. Baiker 52 (1991) 189

XPS and XRD studies of supported Pd–Cu bimetallics, B.L. Gustafson and P.S. Wehner 52 (1991) 261

Photoelectron spectroscopy

Surface analysis of poly(vinyl chloride)/poly(α-methylstyrene-co-acrylonitrile) blends by X-ray photoelectron spectroscopy, S.H. Goh, H.S.O. Chan and K.L. Tan 52 (1991) 1

Evidence for the existence of an interface transition layer for plasma CVD grown SnO_2/Fe_2O_3 multi-layer films, Yan Dawei and Ma Xiaocui 52 (1991) 53

Silicon–carbon reaction provoked by the sputter cleaning of lightly contaminated crystalline silicon, B. Lamontagne, E. Sacher and M.R. Wertheimer 52 (1991) 71

XPS study of thallium oxidation states in precursor TlBaCaCuO HTSC thin films, K.H. Young, E.J. Smith, M.M. Eddy and T.W. James 52 (1991) 85

Evidence for the role of surface transients and precursor states in determining molecular pathways in surface reactions, M.W. Roberts 52 (1991) 133

Correlation of surface composition and thiophene HDS activity of moderately sulfided $CoMo/Al_2O_3$ catalysts, T.I. Korányi and Z. Paál 52 (1991) 141

Comment on 'Evaluation of polymeric standard reference materials for monitoring the performance of X-ray photoelectron spectrometers' by B.R. Strohmeier, D. Briggs and G. Beamson 52 (1991) 159

Reply to "Comment of D. Briggs and G. Beamson on 'Evaluation of polymeric standard reference materials for monitoring the performance of X-ray photoelectron spectrometers' by B.R. Strohmeier", B.R. Strohmeier 52 (1991) 163

Acid–base behavior of aluminum and silicon oxides – a combination of two approaches: XPS and Lewis acido-basicity; rest potential and Brönsted acido-basicity, M. Casamassima, E. Darque-Ceretti, A. Etcheberry and M. Aucouturier 52 (1991) 205

HREELS, XPS and in-situ friction studies of thin polyphenyl ether films on steel surfaces, B.M. DeKoven and G.E. Mitchell 52 (1991) 215

Angle-resolved photoemission studies of epitaxially grown CuBr films of different thicknesses on Ag(100), H. Engelhard, A. Goldmann, R. Matzdorf and J. Skonieczny 52 (1991) 235

XPS and XRD studies of supported Pd–Cu bimetallics, B.L. Gustafson and P.S. Wehner 52 (1991) 261

XPS characterization of inserted mercury sulfide single layers in a Langmuir–Blodgett matrix, C. Zylberajch-Antoine, A. Barraud, H. Roulet and G. Dufour 52 (1991) 323

Chemical shifts of the O 1s core levels for oxygen dimers in $YBa_2Cu_3O_{7-\delta}$: cluster DVM-Xα calculations, G.L. Gutsev, Yu.M. Shul'ga and V.I. Rubtsov 52 (1991) 329

Temperature-dependent surface modifications of AISI 316L and AISI 440C stainless steel substrates, P. Gröning, S. Nowak and L. Schlapbach 52 (1991) 333

Temperature dependence of Ni^{3+} quantity in the surface layer of NiO, G. Tyuliev and M. Sokolova 52 (1991) 343

The diffusion behaviour of Pb in yttrium iron garnet films, G.N. van Wyk, S. Priggemeyer, W.D. Roos and W. Heiland 52 (1991) 351

Plasma processing

Photoluminescence investigation of III–V semiconductor surface damage induced by PECVD silicon nitride films, A. Piccirillo, R. Marzano, A.L. Gobbi and P.E. Bagnoli 52 (1991) 295

Passivation of shallow donors in GaAs by oxygen plasma exposure, I. Thurzo, E. Pinčík, L. Harmatha, V. Nágl and M. Gaži 52 (1991) 311

A thin SiO layer as a remedy for the indium reduction at the $In_2O_3/\mu c$-Si:C:H interface, J.M.M. de Nijs, C. Carvalho, M. Santos and R. Martins 52 (1991) 339

Platinum

Hydrogen adsorption on cobalt/Pt(110)(1 × 2) surfaces, M. Alnot and J. Fusy 52 (1991) 77

Adsorption and decomposition of trimethylgallium on Pt(111), Z.-M. Liu, X.-L. Zhou and J.M. White 52 (1991) 249

Polymers

Surface analysis of poly(vinyl chloride)/poly(α-methylstyrene-co-acrylonitrile) blends by X-ray photoelectron spectroscopy, S.H. Goh, H.S.O. Chan and K.L. Tan 52 (1991) 1

Degradation of perfluoropolyethers catalyzed by aluminum chloride, P.H. Kasai and P. Wheeler 52 (1991) 91

Comment on 'Evaluation of polymeric standard reference materials for monitoring the performance of X-ray photoelectron spectrometers' by B.R. Strohmeier, D. Briggs and G. Beamson 52 (1991) 159

Reply to "Comment of D. Briggs and G. Beamson on 'Evaluation of polymeric standard reference materials for monitoring the performance of X-ray photoelectron spectrometers' by B.R. Strohmeier", B.R. Strohmeier 52 (1991) 163

Raman scattering

A comparative study of the inhibition effects of benzotriazole and 6-aniline-1,3,5-triazine-2,4-dithiol monosodium salt on the corrosion of copper by potentiodynamic polarization, AC impedance and surface-enhanced Raman spectroscopic techniques, G. Zhou, S. Cai, L. Song, H. Yang, A. Fujishima, A. Ibrahim, Y.G. Lee and B.H. Loo 52 (1991) 227

TPD studies of vanadium oxide films deposited on gold, K.B. Lewis, S.T. Oyama and G.A. Somorjai 52 (1991) 241

Secondary ion mass spectroscopy

The reactions of oxidised aluminium surfaces with lubricant additives and related compounds, J.A. Treverton, J. Ball and M. Fairlie 52 (1991) 107

Improved resolution SIMS analysis of annealed $Pt/Zn/Pt/ZrB_2/Au$ ohmic contacts to p-InGaAs on InP substrates using back-surface profiling, J. Herniman, J.S. Yu and A.E. Staton-Bevan 52 (1991) 289

Silicides

Structural integrity and thermal stability of $TiN/CoSi_2$ used as local interconnect in a self-aligned $CoSi_2$ process, R.I. Hegde, R.E. Jones, Jr., V.S. Kaushik and P.J. Tobin 52 (1991) 59

Silicon

Silicon–carbon reaction provoked by the sputter cleaning of lightly contaminated crystalline silicon, B. Lamontagne, E. Sacher and M.R. Wertheimer 52 (1991) 71

Numerical analysis of fluid flow and nonuniformities in a polysilicon LPCVD batch reactor, Ch. Hopfmann, Ch. Werner and J.I. Ulacia F. 52 (1991) 169

Scaling and self-similarity in growth of clusters on surfaces, M. Zinke-Allmang and L.C. Feldman 52 (1991) 357

Silicon nitride

Electrical characteristics of silicon nitride on silicon and InGaAs as a function of the insulator stoichiometry, P.E. Bagnoli, A. Piccirillo, A.L. Gobbi and R. Giannetti 52 (1991) 45

Photoluminescence investigation of III–V semiconductor surface damage induced by PECVD silicon nitride films, A. Piccirillo, R. Marzano, A.L. Gobbi and P.E. Bagnoli 52 (1991) 295

Silicon oxide

Surface analysis by photoionization of sputtered species with intense picosecond laser radiation, M.J. Dyer, L.E. Jusinski, H. Helm and C.H. Becker 52 (1991) 151

Acid–base behavior of aluminum and silicon oxides – a combination of two approaches: XPS and Lewis acido-basicity; rest potential and Brönsted

acido-basicity, M. Casamassima, E. Darque-Ceretti, A. Etcheberry and M. Aucouturier 52 (1991) 205
A thin SiO layer as a remedy for the indium reduction at the $In_2O_3/\mu c$-Si:C:H interface, J.M.M. de Nijs, C. Carvalho, M. Santos and R. Martins 52 (1991) 339

Silver

Angle-resolved photoemission studies of epitaxially grown CuBr films of different thicknesses on Ag(100), H. Engelhard, A. Goldmann, R. Matzdorf and J. Skonieczny 52 (1991) 235

Sputtering

High spatial resolution chemical imaging of surfaces by combination of a field-emission ion gun and intense laser radiation, S.P. Mouncey, L. Moro and C.H. Becker 52 (1991) 39
Silicon–carbon reaction provoked by the sputter cleaning of lightly contaminated crystalline silicon, B. Lamontagne, E. Sacher and M.R. Wertheimer 52 (1991) 71
Surface analysis by photoionization of sputtered species with intense picosecond laser radiation, M.J. Dyer, L.E. Jusinski, H. Helm and C.H. Becker 52 (1991) 151

Steel

A new electrochemical method for the determination of the free surface of phosphate layers, A. Losch, J.W. Schultze and H.-D. Speckmann 52 (1991) 29
Surface analysis by photoionization of sputtered species with intense picosecond laser radiation, M.J. Dyer, L.E. Jusinski, H. Helm and C.H. Becker 52 (1991) 151
HREELS, XPS and in-situ friction studies of thin polyphenyl ether films on steel surfaces, B.M. DeKoven and G.E. Mitchell 52 (1991) 215
Temperature-dependent surface modifications of AISI 316L and AISI 440C stainless steel substrates, P. Gröning, S. Nowak and L. Schlapbach 52 (1991) 333

Sulphides

XPS characterization of inserted mercury sulfide single layers in a Langmuir–Blodgett matrix, C. Zylberajch-Antoine, A. Barraud, H. Roulet and G. Dufour 52 (1991) 323

Superconductivity

XPS study of thallium oxidation states in precursor TlBaCaCuO HTSC thin films, K.H. Young, E.J. Smith, M.M. Eddy and T.W. James 52 (1991) 85
Chemical shifts of the O 1s core levels for oxygen dimers in $YBa_2Cu_3O_{7-\delta}$: cluster DVM-Xα calculations, G.L. Gutsev, Yu.M. Shul'ga and V.I. Rubtsov 52 (1991) 329

Surface and interface states

Electrical characteristics of silicon nitride on silicon and InGaAs as a function of the insulator stoichiometry, P.E. Bagnoli, A. Piccirillo, A.L. Gobbi and R. Giannetti 52 (1991) 45

Surface composition

Surface analysis of poly(vinyl chloride)/poly(α-methylstyrene-co-acrylonitrile) blends by X-ray photoelectron spectroscopy, S.H. Goh, H.S.O. Chan and K.L. Tan 52 (1991) 1
High spatial resolution chemical imaging of surfaces by combination of a field-emission ion gun and intense laser radiation, S.P. Mouncey, L. Moro and C.H. Becker 52 (1991) 39
Correlation of surface composition and thiophene HDS activity of moderately sulfided $CoMo/Al_2O_3$ catalysts, T.I. Korányi and Z. Paál 52 (1991) 141
Surface analysis by photoionization of sputtered species with intense picosecond laser radiation, M.J. Dyer, L.E. Jusinski, H. Helm and C.H. Becker 52 (1991) 151

Surface diffusion

Scaling and self-similarity in growth of clusters on surfaces, M. Zinke-Allmang and L.C. Feldman 52 (1991) 357

Surface energy

Gas-adsorption study of the surface dehydroxylation and rehydroxylation of controlled porosity glasses, B. Biliński, W. Wójcik and A.L. Dawidowicz 52 (1991) 125

Surface segregation

Temperature-dependent surface modifications of AISI 316L and AISI 440C stainless steel substrates, P. Gröning, S. Nowak and L. Schlapbach 52 (1991) 333

Thermal desorption

Hydrogen adsorption on cobalt/Pt(110)(1 × 2) surfaces, M. Alnot and J. Fusy 52 (1991) 77

TPD studies of vanadium oxide films deposited on gold, K.B. Lewis, S.T. Oyama and G.A. Somorjai 52 (1991) 241

Adsorption and decomposition of trimethylgallium on Pt(111), Z.-M. Liu, X.-L. Zhou and J.M. White 52 (1991) 249

Tin

Scaling and self-similarity in growth of clusters on surfaces, M. Zinke-Allmang and L.C. Feldman 52 (1991) 357

Tin oxide

Evidence for the existence of an interface transition layer for plasma CVD grown SnO_2/Fe_2O_3 multi-layer films, Yan Dawei and Ma Xiaocui 52 (1991) 53

Titanium

Structural integrity and thermal stability of $TiN/CoSi_2$ used as local interconnect in a self-aligned $CoSi_2$ process, R.I. Hegde, R.E. Jones, Jr., V.S. Kaushik and P.J. Tobin 52 (1991) 59

Tribology

HREELS, XPS and in-situ friction studies of thin polyphenyl ether films on steel surfaces, B.M. DeKoven and G.E. Mitchell 52 (1991) 215

Vanadium oxide

TPD studies of vanadium oxide films deposited on gold, K.B. Lewis, S.T. Oyama and G.A. Somorjai 52 (1991) 241

Wetting

HREELS, XPS and in-situ friction studies of thin polyphenyl ether films on steel surfaces, B.M. DeKoven and G.E. Mitchell 52 (1991) 215

Work function

On the work function changes produced by the coadsorption of alkali metals and hydrogen, G.E. Rhead 52 (1991) 19

X-ray diffraction

Structural integrity and thermal stability of $TiN/CoSi_2$ used as local interconnect in a self-aligned $CoSi_2$ process, R.I. Hegde, R.E. Jones, Jr., V.S. Kaushik and P.J. Tobin 52 (1991) 59

XPS and XRD studies of supported Pd–Cu bimetallics, B.L. Gustafson and P.S. Wehner 52 (1991) 261

Composition and growth mechanisms of alumina scales on FeCrAl-based alloys determined by SNMS, W.J. Quadakkers, A. Elschner, W. Speier and H. Nickel 52 (1991) 271

X-ray emission

The characterization of the oxidation of Fe by variable exit angle ultrasoft X-ray fluorescence spectroscopy, T. Scimeca and G. Andermann 52 (1991) 199

Composition and growth mechanisms of alumina scales on FeCrAl-based alloys determined by SNMS, W.J. Quadakkers, A. Elschner, W. Speier and H. Nickel 52 (1991) 271

Zinc

Evidence for the role of surface transients and precursor states in determining molecular pathways in surface reactions, M.W. Roberts 52 (1991) 133
